This year's Sun 'n Fun event was full of opportunities for the FAA Production Studio Crew. With two remote crews on the field all week and over 40 Production Crew members staffing the studio each day, our coverage of events was tremendous.

We hosted a full week of well attended programs in the Studio that included an array of speakers. Mark Grady from AOPA, ASF; Greg Rolle from the Bahamas, John and Martha King, King Schools; Bruce Landsburg AOPA, ASF; Dr. Jordan, Federal Air Surgeon; Marty Weaver, Sport Pilot, just to name a few that joined us for the week.

During the event remote crews for **'Plane Time'** with our host, Ben Coleman, interviewed aviation legends; air show performers; the great grandson of Charles E. Taylor; Peggy Gilligan, Associate Administrator for Regulation and Certification for the FAA; Carolyn Blum, FAA Administrator of the Southern Region. Oh... and there was some rumor of an interview with a couple of bears and a lizzard???.... hmmm... Ben will have to explain that one to us!

The studio had a great week and our Production Crew Members were again.... 'Second to None' ... as they worked their positions throughout the studio.

Thanks to everyone for making this another memorable Sun 'n Fun. As the Studio continues on it's upward swing of growth so will the expectations of the professional capabilities and performance we each exhibit. You are the talent that makes the show go on!!!
